HIGHLIGHTED SKILLS

PROGRAMMING LANGUAGES
java, python, typescript, javascript,
html/css, php, dart

FRAMEWORKS AND DATABASES
flutter, react, next.js, css, mysql, firebase

DEVELOPMENT TOOLS
github, vs code, visual studio, intellij,
docker, powershell, linux

BUSINESS & PRODUCTIVITY
power bi, microsoft project, microsoft
word, microsoft powerpoint

DESIGN TOOLS
figma

AI TOOLS
claude, chatgpt, gemini, manus

EDUCATION

B.Sc. in Software Engineering
University of Bahrain
2021 - 2026

High School
Science Track - Mathematics, Sitra
Secondary School, 95.9
2018 - 2021

VOLUNTEERING

Volunteer — Al Eker Charitable Society
Since 2024
Participating in community support and
charitable activities.

LANGUAGES

Arabic English

PROFILE

Software engineering graduate focused on building practical, reliable solutions and sharpening technical and analytical skills. Works effectively independently or within a team in fast-paced environments. Experienced in taking projects from requirements through development, testing and delivery, with attention to clean code and clear documentation.

RELEVANT EXPERIENCE

Industrial Trainee — Almoayyed Computers Middle East (ACME) Jul 2026 - Aug 2026
Completed a software engineering internship, contributing to three real-world software projects and collaborating within a professional software development environment.

- › **Internship Management System:** Contributed to the development of a web-based system for managing internship processes by implementing new features, improving workflows, and enhancing system functionality.
- › **Down Syndrome Foundation Management System:** Participated in developing an internal management system used by employees to manage beneficiaries, streamline daily operations, and improve organizational workflows.
- › **Pet Adoption Management System:** Contributed to the development of a web application that facilitates pet adoption by managing animal profiles, adoption requests, and administrative processes.
- › Applied the complete Software Development Life Cycle (SDLC) by analyzing business requirements, designing solutions, implementing features, performing software testing, supporting deployment activities, and continuously improving system quality.
- › Leveraged AI-powered development tools to accelerate development, improve code quality, assist with debugging, and enhance problem-solving efficiency.
- › Performed debugging, root cause analysis, and troubleshooting to identify and resolve software defects while maintaining software reliability and performance.
- › Applied software engineering principles, object-oriented programming concepts, and collaborative development practices in a real-world industry environment, strengthening both technical and analytical skills.

PROJECTS

Graduation Project — Irshad 2025 - 2026
Developed a mobile application to support individuals with disabilities using Flutter (Dart) and Firebase. Achieved grade: A

Piscine Go — Reboot01 Coding Institute 2023
Core programming and computer science concepts like conditions, loops, and sorting algorithms.

CERTIFICATION

NLP: Twitter Sentiment Analysis
COURSERA · 2026
Performed sentiment analysis on Twitter data using NLP techniques. Analyzed and classified textual data to identify customer opinions and trends.

Fine Tune BERT for Text Classification with TensorFlow
COURSERA · 2026
Fine-tuned pre-trained BERT models for text classification tasks using TensorFlow. Applied transfer learning techniques to optimize model performance on custom datasets.

Natural Language Processing Essentials
EDUREKA / COURSERA · 2026
Gained foundational and applied knowledge in core NLP concepts and techniques. Implemented text preprocessing, feature extraction, and language modeling methods.

Python 101: Develop Your First Python Program
COURSERA · 2026
Developed basic Python programming skills including variables, loops, and functions.

INJAZ Company Program — Product Development Manager
INJAZ · 2021
Awarded "Best Social Impact" for leading the creation of an impactful solutions.

Sentiment Analysis with Deep Learning using BERT
COURSERA · 2026
Applied BERT-based deep learning models for sentiment classification. Worked with NLP pipelines and transformer models for text analysis.

Create Chatbots & NLP Apps
COURSERA · 2026
Built conversational chatbots and NLP-powered applications. Designed and deployed end-to-end NLP pipelines for real-world use cases.

Python NLTK for Beginners: Customer Satisfaction Analysis
COURSERA · 2026
Performed text analysis using NLTK for customer feedback and sentiment insights. Applied natural language processing techniques to analyze customer satisfaction data.

Microsoft Power BI Data Analyst (PL-300)
MICROSOFT · 2024
Data visualization, dashboards, and business intelligence reporting.
